

Environment Policy

This Environment Policy identifies the key principles for the protection and improvement of the environment managed or influenced by our operations.

Hobart Airport is committed to the following environmental principles in our operations and in all interactions with our stakeholders, our employees, business partners, regulators and our community:

- We recognise our responsibility to the Airport environment and actively manage this by integrating sustainability principles into our decision making, planning, design, development, service delivery and procurement processes.
- We minimise our environmental impact by aiming for best practice in all activities, undertaking monitoring with a focus on continual improvement.
- We actively respond to climate change through mitigation and adaptation.
- We reduce our emissions where practical and offset the balance through the purchase of high biodiversity value carbon offsets.
- We plan ahead to ensure our operations can respond to the impacts of climate change.
- We are sensitive to and responsible in dealing with matters of indigenous and cultural heritage.
- We will comply with relevant legislation and other standards pertaining to the environment.
- We are committed to engage, educate and collaborate to ensure we balance environmental, social and business needs as we operate and grow.

This policy will be reviewed every two years.
