

## APPENDIX G – Progress Against 2022 Master Plan Targets

These targets form part of the new Hobart Airport Master Plan which was approved in March 2023. Reporting against these targets is therefore provided for the period March 2023 – 30 June 2023.

These targets and the Hobart Airport Master Plan 2022 will form the basis of future AERs

Biodiversity Targets	Timeframe	2022/23 Comment
Undertake Grassland Cultural Burning (under EPBC Act)	Short Term 1 – 2 Years	Undertaken March 2023 – To be continued
Update Seven Mile Beach Conservation Management Plan		Not yet commenced in reporting period
Condition assessment of the Commonwealth listed Saltmarsh community east of the runway		Not yet commenced in reporting period
Ecological assessment of the acquired land on Barilla Bay		Not yet commenced in reporting period
Targeted assessment of orchid species in areas of high likelihood	Long Term 3-5 Years	Not yet commenced in reporting period
Assessment of EPBC Act listed species and targeted threatened species populations during optimal flowering periods and update environmental mapping		Not yet commenced in reporting period
Liaison with relevant Tasmanian and Commonwealth departments regarding biodiversity issues		Commenced and ongoing for upcoming development works
Ensure all CEMPs and OEMPs incorporate measures such as silt traps, run-off control to avoid, mitigate and minimise potential adverse impacts to biodiversity values		Mitigation measures included in CEMPs and OEMPs during reporting period
Raise awareness of biodiversity values and opportunities to enhance values through tenant audits		Undertaken and ongoing
Monitor and manage weeds and pests		Ongoing management undertaken as per Section 5
Review operational activities and procedures to ensure potential impacts to adjacent Ramsar wetlands are avoided or mitigated through pollution prevention and managing surface water runoff (noting potential impacts are subject to approval under the EPBC Act)		Not yet commenced in reporting period

Land Targets	Timeframe	2022/23 Comment
Undertake investigations to identify, revise and improve management of contaminated areas (including asbestos, hydrocarbons, PFAS etc)  Decommissioning and removal of remaining underground storage tanks, including contamination testing associated with the removal of hydrocarbon storage systems  Develop site management plans for the retired landfill sites to incorporate findings from the Preliminary Site Investigation to guide ongoing monitoring and site security	Short term 1-2 years	One site commenced removal of hydrocarbon storage system. Ongoing works  Not yet commenced in reporting period
Review and update Contaminated Sites Register including integration with Geographic Information Systems	Annually	Not yet commenced in reporting period
Tenant audits and construction audits will be conducted at a time subject to the duration of the project	(Minimum)	Audits undertaken as per Section 6
Site specific assessments of potential contaminants prior to disturbance or development  Within tenant OEMP and contractor CEMP incorporate Commonwealth and Tasmanian regulations and guidelines - detailed in Figure 11.1 for the management of soil and water		Not required in reporting period  Commenced as per Section 5
Implement mitigation measures as part of CEMPs and/or OEMPs where the potential for disturbance of acid sulphate soils exist		Not required in reporting period
Undertake investigations of potential contaminated sites prior to disturbance or development, including analytical testing where relevant	As required	Not required in reporting period
Investigate appropriate management options for the storage and disposal of contaminated soil, water and other substances / materials in compliance with regulations detailed in Figure 11.1		Not required in reporting period
Support and / or undertake remediation actions where required for fuel spills in accordance with regulations detailed in Figure 11.1		Actions undertaken in accordance with Remediation Action Plan for tenant initiated fuel leak.
Water Targets	Timeframe	2022/23 Comment
Support Tier 1 tenants and relevant contractors to ensure compliance with regulations (Figure 11.1) specific to discharge events, complaints and/or impacts	Short term 1-2 years	Ongoing as per Section 6
Develop ground and surface water monitoring program that describes procedure and review process in collaboration with AEO  Liaison with Commonwealth agencies and Air Services	Annually (minimum)	As per Section 6 a ground and surface water monitoring program is in place. Formalisation of a detailed procedure and review process with the AEO has not yet commenced.  Ongoing. Hobart Airport is a voluntary participant
to investigate surface and groundwater		in the PFAS Airport investigation Program

contamination and to identify new management measures		delivered by the Department of Infrastructure, Transport, Regional Development, Communications and the Arts PFAS / Airport Environment Branch. Investigations commenced in the reporting period and ongoing.
Monitoring and investigating water efficiency opportunities across Hobart Airport operations and tenants  Undertake annual audits and communicate with		Not yet commenced in reporting period
tenants and contractors regarding storm water control devices (servicing and maintenance) and effectiveness of mitigation measures	As Required	Completed as per section 6
Review Site Management Plan (SMP) relevant to water quality, update in the Data Management System and share with staff, tenants and contractors as relevant.		Not required in reporting period
Ensure tenant OEMP and contractor CEMP identify water quality risks and appropriate mitigation measures are in place and effective		Commenced and ongoing for upcoming development works
Climate Change Targets	Timeframe	2022/23 Comment
Develop an Energy Strategy that will include information such as existing capacity, existing demand (including EV) as well as options, costs and benefits of expansion into renewables including solar, and LV network upgrades	Short term 1-2 years	Strategy developed and documented
Achieve ACA Level 4 Accreditation		Level 3+ achieved in the reporting period – a strong step toward the longer-term Level 4 goal.
Investigate energy storage projects to reduce electricity consumption and carbon emissions	Long term 3-	Commenced – investigation of solar complete, installation in Administration building scheduled for FY24.
Investigate and support the rollout of electric vehicle charging stations.	5 years	Engagement with precinct partners/car rentals etc commenced. On site charging station locations identified. Installation FY24.
Airport-led passenger offset program options, as voluntary choice to offset travel emissions		Not yet commenced in reporting period
Maintain a GHG inventory of Hobart Airport's emissions		Complete and ongoing as per Section 4
Investigate actions to guide and influence tenants to achieve carbon reduction from their business operations		Commenced and ongoing.
Undertake LED lighting upgrades where feasible for existing and new lighting infrastructure	Annually (minimum)	Hobart Airport car parking area LED upgrade completed June 2023. Ongoing program of works
Climate change risk assessment and associated actions in relevant areas, such as works, planning, tenant leases		Climate Risk Assessment and Adaptation Plan reviewed and updated April 2023
Investigate ethical offset purchases for unavoidable emissions		Hobart Airport has purchased accredited carbon offsets for scope 1 & 2 unavoidable emissions during the FY 2022-2023 period

Review of accreditation through the ACA program		ACA accreditation Level 3+ achieved during reporting period
Waste Targets	Timeframe	2022/23 Comment
Improve the function and design of the external waste collection station in future Terminal design	Short term	Commenced – included in considerations in building design.
Review and update Hobart Airport's Waste Management Strategy	1-2 years	Not yet commenced in reporting period
Increase the diversion of waste from landfill		Ongoing as per section 4.0
Identify opportunities to improve efficiency in natural resource use, waste reduction and recycling during tenant audits		Ongoing as per section
Improve segregation of waste in car parking areas		Ongoing as per Section 4.0
Monitoring of waste and recycling actions undertaken by contractors	Annually	Not yet commenced in reporting period
Identify opportunities for new contractors and tenants to maintain a waste tracking register as part of their CEMP/OEMP in accordance with Tasmanian waste management regulations	(minimum)	Not yet commenced in reporting period
OEMPs and CEMPs to include provision of hazardous waste certification at either, the conclusion of construction works and or annually, as per regulations detailed in Figure 11.1		Not yet commenced in reporting period
~~~~~		
Cultural Heritage Targets	Timeframe	2022/23 Comment
	Timeframe Short term 1-2 years	Not yet commenced in reporting period
Cultural Heritage Targets Review and update the Hobart Airport Cultural	Short term	
Cultural Heritage Targets  Review and update the Hobart Airport Cultural Heritage Management and Action Plan  Implement measures outlined in the Reconciliation Action Plan  Provide ongoing maintenance to the historic heritage values in accordance with Llanherne House Heritage	Short term	Not yet commenced in reporting period  Completed. The Reflect RAP commitments have been achieved and the development of the next
Cultural Heritage Targets  Review and update the Hobart Airport Cultural Heritage Management and Action Plan  Implement measures outlined in the Reconciliation Action Plan  Provide ongoing maintenance to the historic heritage values in accordance with Llanherne House Heritage Management Plan  Engage with Aboriginal Heritage Tasmania, prior to any development work in areas of previously recorded	Short term	Not yet commenced in reporting period  Completed. The Reflect RAP commitments have been achieved and the development of the next level Innovate RAP is underway.
Cultural Heritage Targets  Review and update the Hobart Airport Cultural Heritage Management and Action Plan  Implement measures outlined in the Reconciliation Action Plan  Provide ongoing maintenance to the historic heritage values in accordance with Llanherne House Heritage Management Plan  Engage with Aboriginal Heritage Tasmania, prior to	Short term	Not yet commenced in reporting period  Completed. The Reflect RAP commitments have been achieved and the development of the next level Innovate RAP is underway.  Ongoing. Not required in reporting period
Cultural Heritage Targets  Review and update the Hobart Airport Cultural Heritage Management and Action Plan  Implement measures outlined in the Reconciliation Action Plan  Provide ongoing maintenance to the historic heritage values in accordance with Llanherne House Heritage Management Plan  Engage with Aboriginal Heritage Tasmania, prior to any development work in areas of previously recorded heritage value  Prepare unanticipated Discovery Plans in project areas	Short term 1-2 years	Not yet commenced in reporting period  Completed. The Reflect RAP commitments have been achieved and the development of the next level Innovate RAP is underway.  Ongoing. Not required in reporting period  Ongoing. Not required in reporting period.
Review and update the Hobart Airport Cultural Heritage Management and Action Plan Implement measures outlined in the Reconciliation Action Plan  Provide ongoing maintenance to the historic heritage values in accordance with Llanherne House Heritage Management Plan  Engage with Aboriginal Heritage Tasmania, prior to any development work in areas of previously recorded heritage value  Prepare unanticipated Discovery Plans in project areas that have previously reported values  Liaison with State and Commonwealth Government departments and community groups regarding activities that may impact cultural heritage values at	Short term 1-2 years	Not yet commenced in reporting period  Completed. The Reflect RAP commitments have been achieved and the development of the next level Innovate RAP is underway.  Ongoing. Not required in reporting period  Ongoing. Not required in reporting period.  Ongoing. Not required in reporting period.

Include appropriate heritage management measures		Ongoing with development of new plans and
in tenants OEMP and/or lease agreements		lease agreements
Raise awareness of heritage values through tenant		Not yet required in reporting period
auditing		
Air Quality Targets	Timeframe	2022/23 Comment
Review and update of the environmental risk register	Short term	Not yet required in reporting period
and environmental compliance register	1-2 years	
ARFF training reports, notifications and liaison as		Actioned and ongoing
required		
Review and update, where necessary, Hobart Airport's		ICMP updated April 2023.
Integrated Carbon Management Plan to identify		
specific opportunities to reduce our carbon footprint		
Review of contractor CEMPs to ensure potential air		Not yet required in reporting period
quality impacts are addressed	_ ,	
Liaison with government department regarding air	Annually	Not required in reporting period
quality initiatives / requirements where relevant to	(minimum)	
airport operations		
Review and update of the Hobart Airport asbestos and		Not yet commenced in reporting period
ozone depleting substances register and Geographical		
Information System (GIS)	_	
Include in relevant tenant lease agreements and		Included in current OEMPs and lease agreements
OEMPs management of potential air quality impacts		where relevant.
Ground Based Noise Targets	Timeframe	2022/23 Comment
Monitor complaints register regarding ground-based		No ground-based noise complaints received
noise issues		
noise issues		during reporting period.
Undertake noise quality assessments where impacts	Annually	
Undertake noise quality assessments where impacts persist and implement measures to decrease ground	Annually (minimum)	Not required during reporting period. No noise
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts	Annually (minimum)	
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on		Not required during reporting period. No noise complaints received.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes	(minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets		Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including	(minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets	(minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including	(minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register	(minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the	(minimum) Timeframe	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP	(minimum) Timeframe	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to Section 6.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites Review and update the PFAS Management Plan	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites Review and update the PFAS Management Plan  Ensure potentially hazardous waste is classified and	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to Section 6.  Not yet commenced in reporting period.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites  Review and update the PFAS Management Plan  Ensure potentially hazardous waste is classified and disposed of by a licensed contractor to an appropriate	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to Section 6.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts Participate in government programs or initiatives on noise mitigation schemes Hazardous Substances Targets Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites Review and update the PFAS Management Plan  Ensure potentially hazardous waste is classified and disposed of by a licensed contractor to an appropriate receiving facility, with associated certification	(minimum)  Timeframe  Annually (minimum)	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to Section 6.  Not yet commenced in reporting period.  Ongoing. See section 4.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts  Participate in government programs or initiatives on noise mitigation schemes  Hazardous Substances Targets  Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites  Review and update the PFAS Management Plan  Ensure potentially hazardous waste is classified and disposed of by a licensed contractor to an appropriate receiving facility, with associated certification  Review contractor CEMP and tenant OEMP to ensure	(minimum)  Timeframe  Annually	Not required during reporting period. No noise complaints received.  Not yet commenced in reporting period  2022/23 Comment  Not yet commenced in reporting period  Tenant audits undertaken  Surface and groundwater monitoring undertaken in accordance with monitoring program. Refer to Section 6.  Not yet commenced in reporting period.
Undertake noise quality assessments where impacts persist and implement measures to decrease ground base noise activities or impacts Participate in government programs or initiatives on noise mitigation schemes Hazardous Substances Targets Review of Hobart Airport procedures including SMP01, Asbestos Register, Contaminated Site Register  Liaison with tenants on mitigation measures for the handling and storage of contaminating substances during audits and documented within OEMP  Surface water and groundwater monitoring to understand existing levels and movement of contamination, including the retired landfill sites Review and update the PFAS Management Plan  Ensure potentially hazardous waste is classified and disposed of by a licensed contractor to an appropriate receiving facility, with associated certification	(minimum)  Timeframe  Annually (minimum)	Not required during reporting period.
